MARCIN MICHALSKI

F R O N T - E N D   D E V E L O P E R

PROFILE

Passionate about programming and web development, I've built my foundation in the logistics arena as an inventory controller, troubleshooter, and team lead. These roles equipped me with skills ranging from process optimization and collaborative leadership to effective problem-solving.

Now, I'm enthusiastically channeling this passion into creating web apps and continuously advancing my coding expertise.

WORK EXPERIENCE

Team Lead

Belden Wire&Cable | Netherlands | 02.2021 - 08.2022

- Assign tasks and responsibilities to team members, and monitor their performance.
- Implemented a performance tracking system to monitor individual and team KPIs.
- Generate reports to track warehouse performance and provide regular updates to higher management.
- Coordinate with other teams to ensure timely replenishment of stock and stock accuracy.
- Provide training and coaching to team members to enhance their skills and knowledge.

Troubleshooter

DSV - Global Transport&Logitics | Netherlands | 2017-2021

- Proactively suggested process improvements based on troubleshooting experiences, resulting in enhanced operational efficiency.
- Assisted with inventory control by identifying and addressing issues related to incorrect product placement or handling, leading to improved inventory accuracy.
- Collaborated effectively with different departments.
- Familiar in using inventory management software and systems to track, monitor, and analyze stock levels, ensuring accurate and up-to-date records.
